## Education

### SRM Institute of Science and Technology, Delhi NCR

*Expected May 2027*

BTech Computer Science Engineering (Data Science)

GPA: 8.3/10

*Relevant Coursework: Data Structures & Algorithms, OOP, System Design, Machine Learning, DBMS, Software Engineering*

## Experience

### AI Engineering Intern

*Havish M Consultancy — On-site*

*Full-Stack & ML Engineering*

Jul 2025 – Dec 2025

- Designed ML-driven document intelligence platform (Django + React) for Landmark Group; automated extraction pipeline cutting processing time by **50%**.
- Built Streamlit dashboard integrating open-source LLMs for real-time KPI tracking; improved on-time delivery by **70%**.
- Engineered REST APIs in Python achieving sub-200ms response times under concurrent load.

### Machine Learning Engineer

*Raphsons Robotics Ltd (Incubated Startup, SRM IST)*

*ML & Data Engineering*

Mar 2025 – Dec 2025

- Built end-to-end data pipeline (pandas, NumPy, PostgreSQL) achieving **1000+ images/hour** throughput with **25%** faster runtime.
- Developed real-time anomaly detection for robotic inspection; improved accuracy by **40%** via feature engineering; applied quantization and pruning for production.

### Backend Developer Intern

*Sacred Gurukul — On-site*

*Django & Full-Stack*

Dec 2025 – March 2026

- Contributed to two live products (Hospaccx Healthcare, Sacred Gurukul EdTech); built scalable Django REST APIs with MongoDB.
- Implemented secure authentication, RBAC, and payment integration; maintained agile documentation.

### Visual and UX Designer

*Aadi Art — Remote*

*Figma*

March 2026 – May 2026

- Designed end-to-end UI/UX from scratch in Figma for production — prioritised visual identity, intuitive user experience, and onboarding flows to drive new user acquisition and retention.
- Architected full tech stack in a 4-member founding team; owned cross-functional documentation and ensured design-to-dev handoff fidelity.
- Built geospatial visualisation module (MapLibre GL) enabling region-wise exploration of cultural datasets.

## Projects

### TaskFlow: Collaborative Task Management

*React, Node.js, MySQL, AWS EC2, Docker*

Full-stack system for **100+ concurrent users**; sub-200ms APIs; **45% faster** queries via SQL optimisation; deployed on AWS EC2 with Docker.

### GreenTrack: AI-Powered Waste Classification

*Python, PyTorch, PostgreSQL, Docker*

ResNet CNN with **90% accuracy**; **35% smaller** memory footprint via quantization and pruning; PostgreSQL for failure-mode tracking.

### SoilSenseAI: Agricultural Intelligence

*Python, Django, MySQL, Scikit-learn*

Ensemble ML pipeline with **85% accuracy**; **500+ daily predictions**; **30%** lower inference latency through iterative optimisation.

## Technical Skills

**Languages** Python, Java, C++, SQL, HTML/CSS

**Web/Backend** Django, FastApi, REST APIs, Node.js/Express.js, React, Microservices

**Databases** Cassandra, Pinecone, MySQL, MongoDB, Redis

**ML & Data** Scikit-learn, PyTorch, TensorFlow, pandas, NumPy, Feature Engineering, EDA, Statistical Analysis

**Viz & BI** Streamlit, PowerBI, Matplotlib, Seaborn, Plotly

**DevOps** AWS (EC2, S3), Docker, Git, CI/CD, Kubernetes (Basic), Postman, JIRA

## Achievements & Certifications

**Awards:** Winner — IIT Delhi Tryst 2025 CarbonXchange; Winner — GeeksforGeeks Hackathon 2025; Top 10 Finalist — Smart India Hackathon

**Certifications:** Machine Learning Specialization (Coursera) | Business Analytics | Statistical Methods Certificate

**Open Source:** GirlScript Summer of Code (GSSoC) — Open Source Contributor & Volunteer, Summer 2025 & 2026

**Leadership:** E-Sports Club PR & Social Media Lead; NSS Active Volunteer — Educational Workshops (2023–2024)
